

## Erasmus+ Programme Key Action 2 project ARTIN Future

The project ARTIN Future, which was launched in March and deals with the topics of Artificial Intelligence and digitalization against the current educational background, continues. The website has been launched. In the future it will contain all developed learning and teaching materials created during the project life cycle by the consortium.

<https://ai-future-project.eu>

### What can be find on the site?

- The mission of the project and its goals
- Learning material IO1 - ARTIN Future - Ethics and Artificial Intelligence
- Learning material IO2 - ARTIN Future - Digital skills
- An advanced link to the interactive OER HUB, which provides knowledge about Artificial Intelligence in the business world.

The project partnership is consciously working to develop such learning material on the topic of the the growing importance of Artificial Intelligence, as the pandemic showed that this topic has a role for current and future generations, especially for young learners and educators.

A regular look at the webpage helps to be up-to- date with the progress of the project.

We are looking forward to your visit 😊
