LEARNING UNIT 2.3

Course:	ArtIn Future – Ethics in Artificial Intelligence
Module:	2. What does AI do? The potential and risks of AI from an ethical point of view
Unit:	2.3 A case study of the potential and risks of AI
Subject:	Analysis of AI of your choice
Class:	Learners in secondary education (13 -18 years old)
Duration:	45 minutes (plus homework)

Lesson outcome: the learners are given the opportunity to test out the theory and present the potential and risks of AI of their choosing from economic, technical, and social perspective

Lesson implementation	
Introduction phase	In the introductory phase, the learning facilitator explains the learners that they should choose an AI and analyse its potential and risks from economic, technical, and social perspective. You have an example presentation elaborated for 9th graders you can use in this phase to start the session. Duration: 5 minutes
Implementation phase	The learners are expected to write a case study that will cover all of the above mentioned aspects. Duration: 35 (to 80) minutes (depending on the class dynamics)
Closing phase	In the closing phase, they reflect on the assignment. Duration: 5 minutes

Equipment:
PC / tablet / laptop / smartphone, beamer, whiteboard / online whiteboard, markers, ArtIn Future PowerPoint presentation
